Scheme

A private class -
Only 1 player will be
grouped in one timeslot

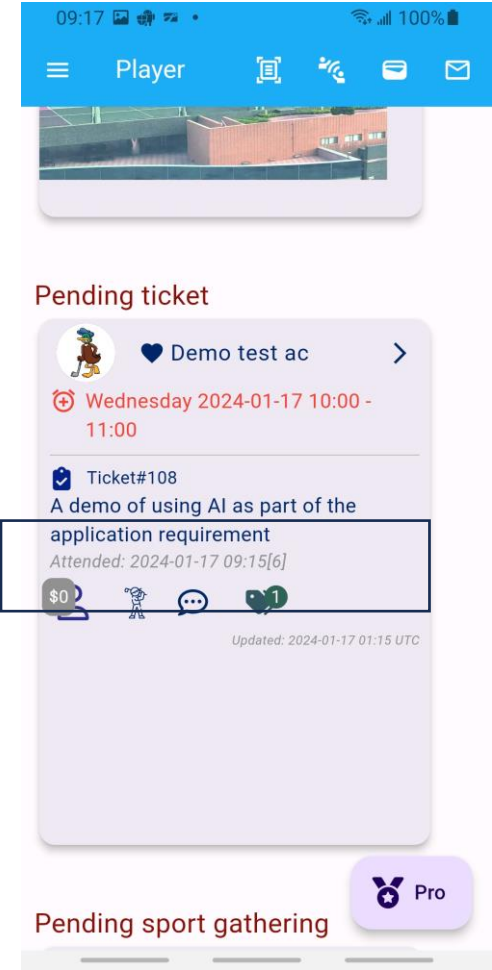

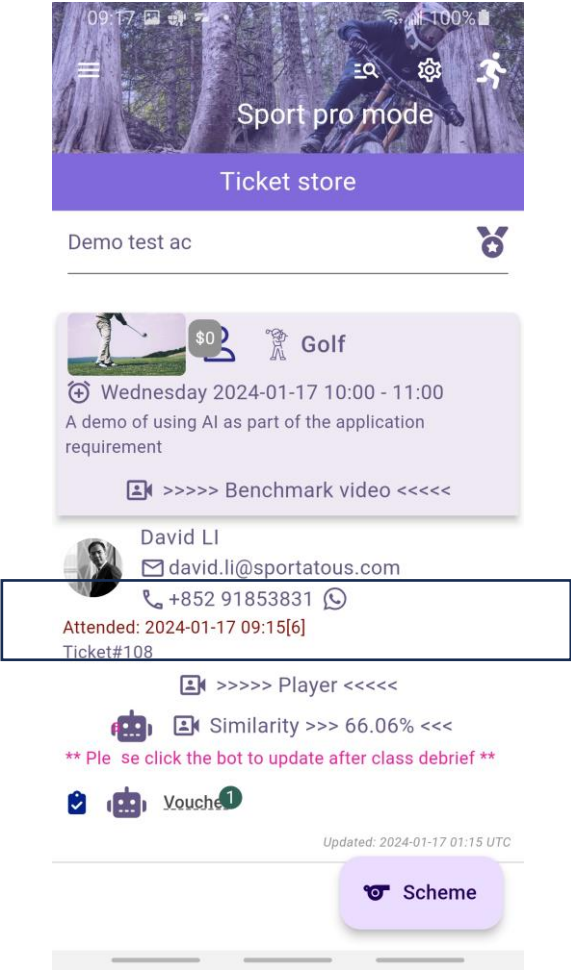

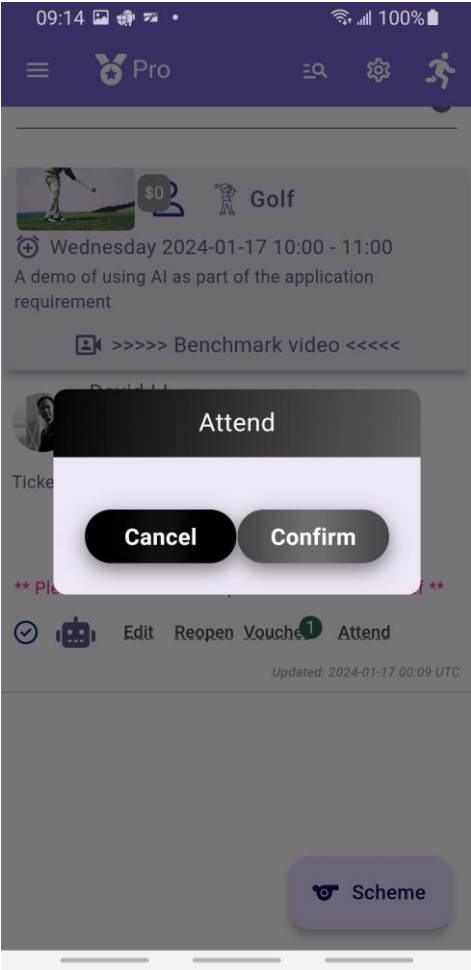

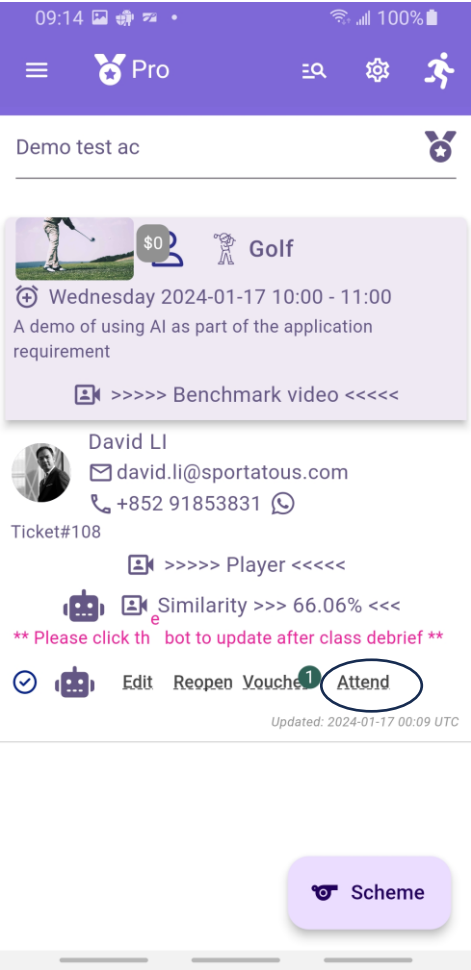

1

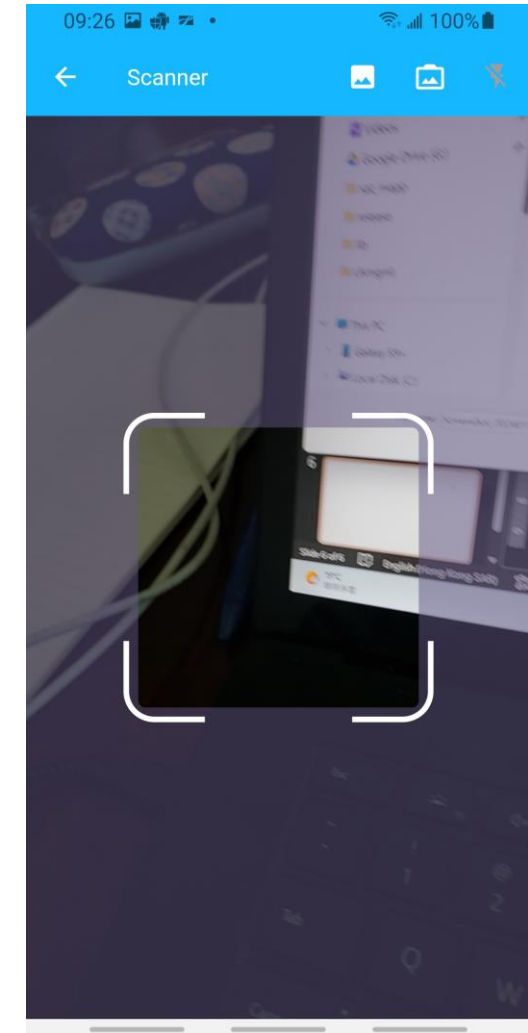

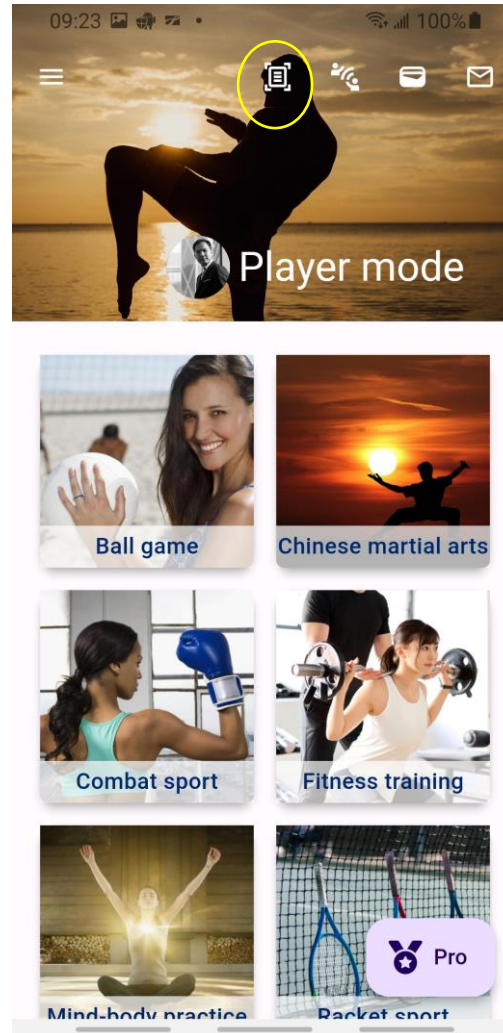

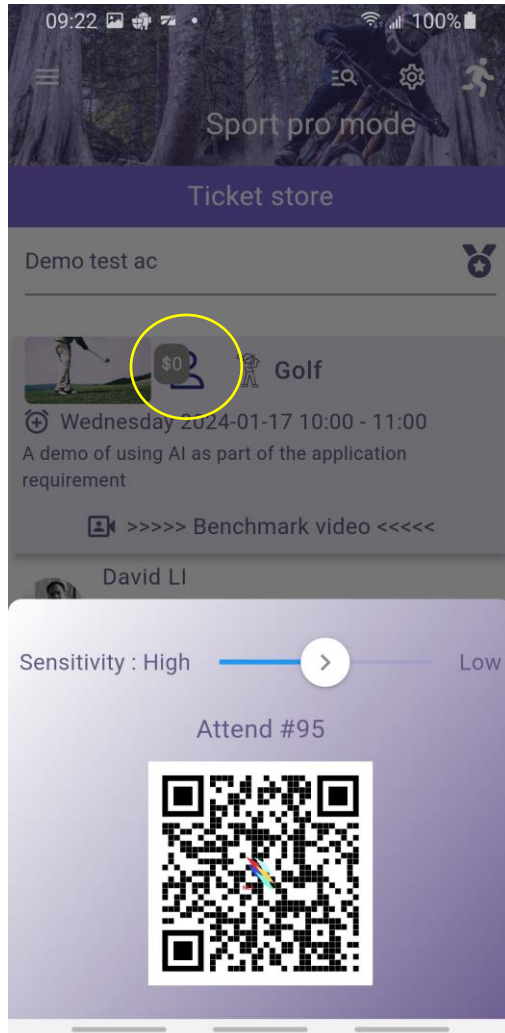

Don't necessarily to set up many classes with different timeslot at first. Just a general lesson plan and then integrate it later. After integration, the system will automatically create a class with a specific time slot for you.

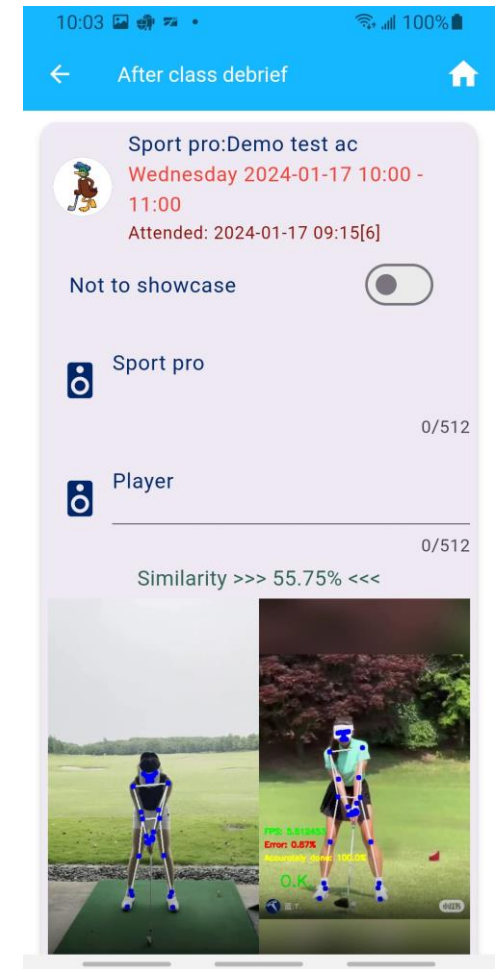

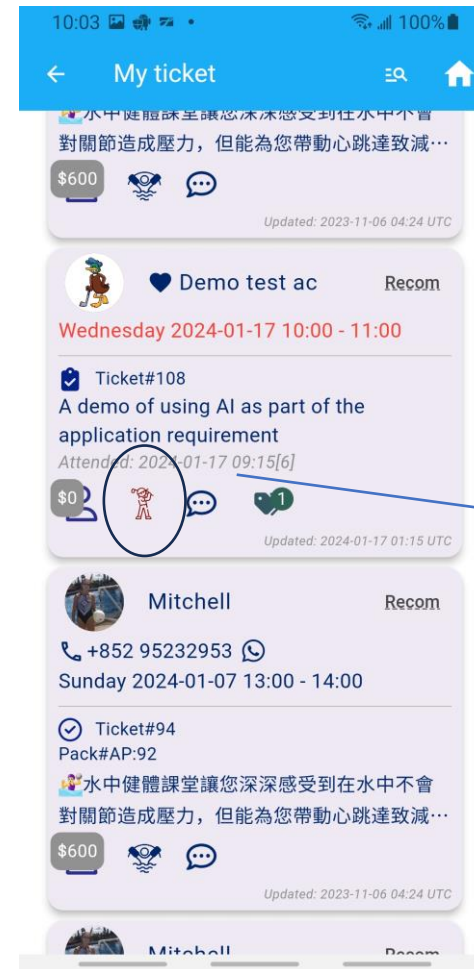

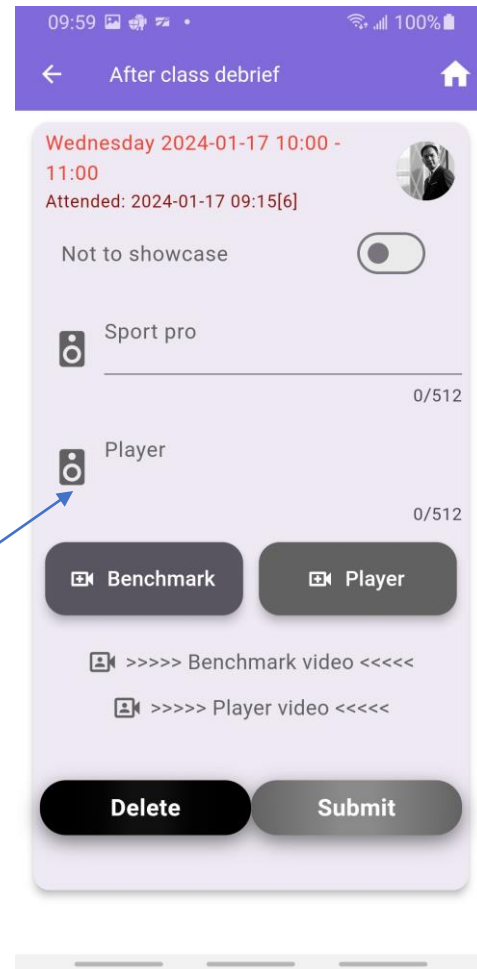

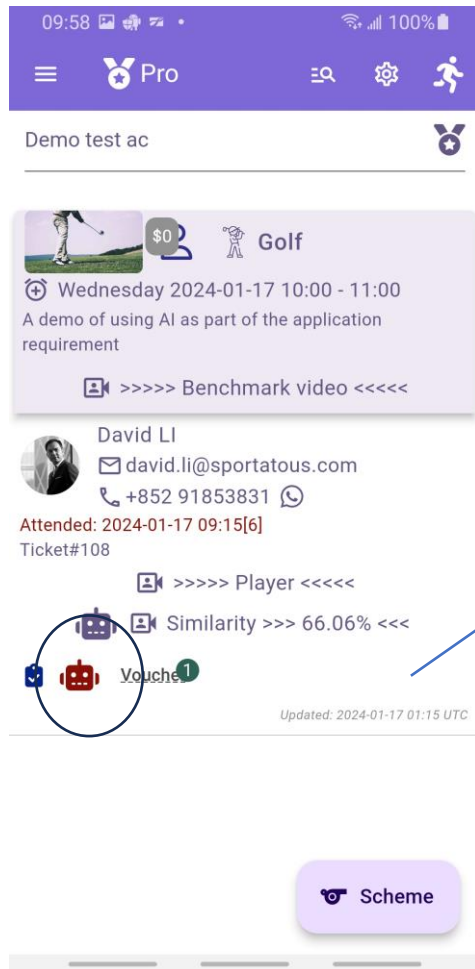

You can have an AI pre-assessment process. First diagram is the student panel to upload video for your assessment. And the 2nd and 3rd panel is the sport pro panel to see their incoming ticket with assessment video.

How to take attendance if necessary? Option (1) above by Sport pro

How to take attendance if necessary? Option (2) above by student scanning QR code of the Sport Pro

You can have an AI after class debriefing. The first 2 diagrams show how to update. The last 2 diagrams show how student can review it.
